7. SAL Level  $10^{-5}$

## PACKAGING

- Lot number is printed on packaging for tracking.
- Bag packing, rack packing and refilling packing.
- Cartons are customized for protecting products.

Pipette tips are manufactured from raw materials or United States Pharmacopoeia (USP) Class VI Polystyrene. They have excellent inner construction to fit most brand pipettes. In addition, the good sealing design is to eliminate leaking. The inner surface is smooth, highly transparent, and with features of low-adsorption and accurate capacity.
