Features:

- * USB data recording system automatically records the test process data throughout the whole process.
- * The whole experiment data can be recorded by USB flash disk (temperature and rotation time can be recorded).
- * Download data, automatically list, save and print, and easily playback the experimental process with a mouse click, which is convenient for optimizing reaction conditions, screening experimental methods and confirming the experimental process.
- * Multi-stage speed temperature and time control system can set a variety of different speed temperature and time experiment modes at one time, and automatically change the operation mode during operation.
- * Super low speed start, the speed is out of control, automatic lock, start speed adjustable unique dynamic balance design, to ensure smooth operation.
- * Mute fan design and forced convection mode and unique air duct design to ensure a good temperature uniformity.
- * Users can freely set up three operation modes of alternating forward, reverse, positive and reverse.
- * LCD display, temperature, time, speed and interface display.
