

Vacuum Blood Collection Tube

Technical Parameters:

Product Name	Na-Citrate: blood sample 1:9 tube
Model	BK-CY104
Lid Color	Blue
Volume	2-9ml
Material	PET, glass
Specifications	13*75mm, 13*100mm, 16*100mm
Application	It is used to test coagulation mechanism (PT, APTT, coagulation factor) in clinical medical examination. Citric acid, sodium concentration of 109mol/L, collected blood and anticoagulant accurate ratio of 9: 1.

Product Name	EDTA.K2/K3 tube
Model	BK-CY105
Lid Color	Purple
Volume	2-9ml
Material	PET, glass
Specifications	13*75mm, 13*100mm, 16*100mm
Application	Used in clinical hematology tests, such as blood routine tests, etc. Applicable for all kinds of blood cell analysis (such as blood cell morphology microscopy, blood count, hematocrit, hemoglobin, sickle test, etc.).

Product Name	Heparin sodium/heparin lithium tube
Model	BK-CY106
Lid Color	Green
Volume	2-9ml
Material	PET, glass
Specifications	13*75mm, 13*100mm, 16*100mm
Application	It is used for the collection and anticoagulation of blood samples in clinical biochemistry and emergency biochemistry tests (hemagglutination, biochemistry, gene diagnosis, enzymology, enzyme immunoassay, etc.).

Technical Parameters:

Product Name	Sodium fluoride compound anticoagulant tube
Model	BK-CY107
Lid Color	Gray
Volume	2-9ml
Material	PET, glass
Specifications	13*75mm, 13*100mm, 16*100mm
Application	It is used for clinical blood glucose measurement and can keep the original character of blood samples for a long time.

Product Name	Na-Citrate: blood sample 1:4 tube
Model	BK-CY108
Lid Color	Black
Volume	2-6ml
Material	PET, glass
Specifications	13*75mm, 13*100mm
Application	Used for erythrocyte sedimentation rate test

Product Name	Na-Citrate: blood sample 1:4 tube
Model	BK-CY109
Lid Color	Black
Volume	1.28ml
Material	glass
Specifications	8*120mm
Application	Used for erythrocyte sedimentation rate test
