# BRUNER Viral Transport Medium

Foetal bovine serum is added to a solution of Hanks’ salts, maintaining virus activity over a wider temperature range. This facilitates the extraction of nucleic acid for subsequent samples, as well as the isolation of the virus.

- Can be stored at room temperature
- Effective antibiotic-antifungal combination enables various applications
- Conical transport tubes–no decanting necessary for centrifugation
- 3.5mL of Transport Activated Media
- Flocked Flexible Oropharyngeal swab and Nasopharyngeal swab with molded breaking point

Medium	Application	Product Description	Packing
3.5mL Activated Media	<ul style="list-style-type: none"><li>• Oropharyngeal</li><li>• Nasopharyngeal</li></ul>	10mL Screw Cap Conical VTM tubes packed with flocked swabs with molded breaking points for Oropharyngeal and Nasopharyngeal	<ul style="list-style-type: none"><li>• 50 VTM Tubes</li><li>• 50 Oropharyngeal Swabs</li><li>• 50 Nasopharyngeal Swabs</li><li>• 50 Biohazard Bags</li></ul>
