

Electric Hospital Bed

Introduction:

The electric hospital bed is a device that changes the position of the bed through an electrical control system. The multifunctional electric bed provides complex postures for clinical needs such as back, bent legs, full lift, full forward tilt, full back tilt, etc., which is convenient for nursing staff to operate and can effectively reduce the labor intensity of nursing staff.

Features:

- * Use high-quality materials: the bed frame and the bed board are made of high-quality steel plate, and the surface is electrostatically sprayed. The head and foot of the bed are made of ABS high-quality engineering plastics for one-time molding.
- * Casters: 125MM central control casters, flexible rotation, one-foot brake, four-wheel brake, safety, stability, high wear resistance, no noise.
- * Electronic control system: using high-quality motors and control systems, the system runs stably and has high safety.

Technical Parameters:

Model	LK-DH-I	LK-DH-II
Instrument Size	2150*1080*460~680mm	
Back Angle	0~80±5°	
Bent Leg Angle	0~40±5°	
Lifting Range	460~680mm	
Front and Rear Tilt Angle	\	0~8±1°
Safe Load	0~240kg	
Power Supply	220V±10%, 50/60Hz	
Optional Accessories	Mattress, IV pole, movable dining table.	
Net Weight	210kg	
Package Size	2170*970*690mm	
Gross Weight	246kg
