NTRODUCTION

Dispensing booth is a kind of partial purifying equipment for filling, refilling, weighing and sampling of raw material and compounds. It is provided with HEPA filter, which prevents the airborne dusts by down draught technique. The unit eliminates powder contamination to protect the operator and the surrounding environment.

Dispensing booth is also called sampling booth or weighing booth.

FEATURES

- 1. Customized design is welcome.
- 2. Unique designed air duct effectively controls the noise.
- Differential pressure gauge is equipped to real-time monitor the filters. 3. Smooth transitions of wall and ground can eliminate the blind angle.
- 6. Automatic changeable frequency system monitors the air velocity to ensure its stability in the work area. 5. Intelligent control mode and alarm system ensure the reliability of running.
- 7. Uniform flow design of main working area can protects the operators and prevent environmental pollution and cross contamination of products.
 - 8. Dispensing Booth(Sampling or Weighing Booth) has primary filters, medium efficiency filters and HEPA filters to keep air cleanliness of work area.
